

PACE Telematics launches PACE Drive Business: The digital fleet card for efficient fleet management

Karlsruhe, 05.02.2025 – PACE Telematics, the leading provider of mobile payment solutions in the European gas station market, is expanding its PACE Drive app with the new **PACE Drive Business** function. This digital fleet card, which is available immediately, enables companies to manage their fleet efficiently, securely and paperlessly.

With *PACE Drive Business*, PACE Telematics offers a forward-looking solution for freelancers, small teams and growing companies. *PACE Drive Business* is introduced in several phases: While the starter package for individual users has already been available since the end of September 2024, the team package for small fleets with up to 5 drivers is now following after an intensive test phase. Further models such as the Fleet+ package with an extended range of functions for larger fleets are planned. The digital fleet card from PACE focuses on maximum security, full transparency and efficient, paperless processes.

By integrating credit cards, digital fuel receipts and centralized driver and vehicle management, *PACE Drive Business* offers simple and secure processing of refuelling costs. The PACE Drive app already enables mobile payment at over 8,000 gas stations across Europe and the network is constantly being expanded. With the addition of *PACE Drive Business*, PACE Telematics is going one step further and establishing a central app solution that is specifically tailored to the needs of modern companies and vehicle fleets. The solution is particularly suitable for companies whose vehicles are on the road in Germany and across borders, e.g. to Austria, the Netherlands, Belgium, Luxembourg, Denmark and Italy.

‘With PACE Drive Business, we are setting a new standard in fleet management. Our digital fleet card combines the advantages of mobile payment with maximum security and efficiency. But this is just the beginning: we are driving integration deep into commercial vehicles and business solutions to make fleet

management seamless, secure and fully digitalised,' says Philip Blatter, Managing Director and founder of PACE Telematics.

The currently available *PACE Drive Business* packages, which are tailored to the individual needs of companies:

- **Starter:** Ideal for individuals and the self-employed to separate business and private journeys.
- **Team:** Perfect for small teams with up to 5 drivers, enables centralised management of drivers, receipts and payments.

PACE Drive Business is activated simply via an in-app purchase, allowing companies to start optimising their fleet management in just a few minutes. The PACE Drive app is available free of charge from the Google Play Store and the Apple App Store and can be used on smartphones, smartwatches and directly in the vehicle via Apple CarPlay and Android Auto. *PACE Drive Business* Starter is free of charge. The team package costs €9.99 per month, can be cancelled monthly and includes access for the fleet manager and up to four additional drivers.

With the launch of *PACE Drive Business*, PACE Telematics is emphasising its commitment to developing innovative and customer-oriented solutions that meet the requirements of modern mobility.

About PACE Telematics & Connected Fueling

The open Connected Fueling platform operated by PACE Telematics enables mobile payment directly at the petrol pump through a standardised, cost-saving connection of all partners to the Connected Fueling cloud system. The neutral platform is open to all oil companies, petrol station operators, fuel card issuers and POS system providers. In addition, the platform offers car manufacturers and app providers flexible interfaces and easy-to-integrate SDKs (software development kits) to integrate the mobile payment function into their systems.
